

# TOTAL QUALITY ASSOCIATES

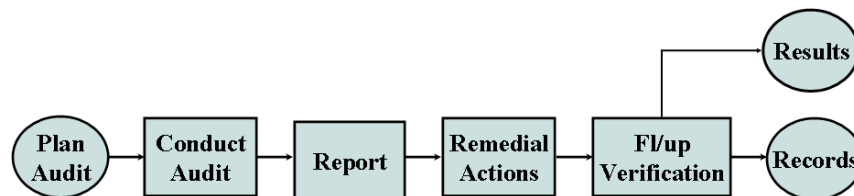

*Achieving Results through Business Excellence*

## Learning and Applying Practical Auditing Concepts & Skills

**Goal:** to create quality system auditing capability that will *add real value to your business*. This has a big impact on resource allocation, which will help the bottom-line.

### You will:

- Explore crucial fundamentals of effective auditing so the business benefits are maximized.
- Practice techniques used by experienced auditors.
- Learn a step by step approach to auditing that will help your internal audits go smoothly.
- Probe the 10 key success factors and 5 lethal land mines of auditing.
- Be able to critique your current internal audit approach against best practices.

- Participate *in an actual audit from planning & evaluation through analysis of the findings and the closing meeting!!*

### ***Expected outcomes:***

- √ Better business results.
- √ More effective and efficient auditor capability.
- √ Greater organizational receptivity to the audit process.

**This is a 1 1/2 day, highly interactive workshop. It will be held at one of the participating companies, where an actual audit will occur with attendees being involved in all the auditing activities.**

Contact us for workshop structure, cost and dates.
